# Dairy session covers bases

Second time round . . . Attendee Darren Lloyd talks to James Stockfeed representative Allan Wallace.

Important information . . . YDDP committee member Tim Gentle felt the MilkingIT session filled an industry gap.

More than 60 people from around the district turned out for a successful MilkingIT technology day held at the Kyabram DPI.

The session was run by the Young Dairy Development Program and covered Internet banking, water trading, herd management tools, computer buying, emails and website designs.

According to committee member Tim Gentle "there obviously was a need".

"This has been an informative day . . . good value for updating people, it covered a good balance," Kyabram dairy farmer Darren Lloyd said.

This is the second session he has attended.

Attendees had the opportunity to speak to industry professionals and see first hand how their technologies work.

Young farmer James Maxwell from Cohuna found the day informative.

Not having many opportunities for young people to network, he believes "it's more important than ever to bring young people in the dairy industry together".

YDDP is run by a keen committee determined to provide industry sessions for young farmers.

"There's Money in Milk" is a free workshop to be run by the committee on Wednesday, July 30 at the Rochester tennis club-rooms.
